

Employment Opportunities

CMI Energy, through its US subsidiary CMI EPTI in Erie, Pennsylvania, is looking for experienced and proven individuals to support the growth of its Heat Recovery Steam Generator (HRSG's) product line. These individuals should have sufficient technical knowledge of boilers to work with customers and partners to provide innovative solutions to the boiler/utility industry.

The following positions are available:

Account Manager – Responsible to develop and maintain key sales accounts, coordinate and close sales of HRSG projects to key accounts and provide recommendations on sales and marketing strategy and business development. Degree in Engineering or Business, technical experience and commercial experience with combined cycle power projects is required.

Lead Engineer – Responsible for leading all technical aspects in specification, design and delivery of HRSGs and associate auxiliary equipment. Proposal development and project execution experience required. Bachelor Degree in Mechanical or Chemical Engineering and minimum 5 years experience in the steam generation industry

Manager, Process and I&C Engineering – A working manager who leads a team of Thermal Process, Instrumentation, Controls and Electrical Engineers in the contract execution phase of final design development through implementation. Bachelor Degree in Engineering and 5 to 7 years experience in the boiler industry, with proven experience in management required.

Structural Engineer – Perform design analysis/calculations of structural components to define foundation load, structure loading, member sizing, connection design and/or piping supports. Bachelor Degree in Mechanical or Civil Engineering and industry experience required. Professional Engineer Certification, a plus

Process Engineer – Responsible for design criteria for designing superheaters, boilers, economizers. Conduct analysis to assure system performance, circulation design, start-up requirements and performance test requirements. Bachelor Degree in Mechanical Engineering and industry experience required. Professional Engineer Certification, a plus.

Quality Surveillance Specialist – perform surveillance of suppliers and subcontractors to assure required quality is maintained and any quality issues identified and addressed. Ensure manufacturing procedures comply with applicable codes and client requirements. Engineering degree or equivalent experience, including 5 years supervisory experience in manufacturing or steam generating equipment. Working knowledge of ISO, ASME, AWS, CSA standards and codes required as is previous vendor qualification and surveillance experience.

Applicants should send their resumes, with salary requirements to CMI EPTI, LLC, Attn: Human Resources, at: 5300 Knowledge Parkway, Suite 200, Erie, PA 16510-4660; fax: 814-897-7166 or by email to info@cmiepti.com. We are an equal opportunity employer.
